

Laptop Battery Tester / Detector

Description:

This smart battery detector has the following functions:

1) Check:

- Information
- Service time
- Charge and discharge
- Circuit, temperature, voltage, electric current
- Revelation in real time of Charge and discharge temperature, bias voltage and drift report

2) Test:

- Function (anti-over current and anti-over voltage function) performance of cells test
- Battery performance assess
- Circulation test report
- Fast testing

3) Check up:

- Voltage check up
- Current check up
- Capacity check up when fully charged

4) Correction:

- Capacity correction when fully charged
- Automatic circulation
- Cells and voltage deviation correction

5) Report

- attached a report slip printer
- print out test report slips

Made in China
