

SOLAR CELL TPS-102

ACCESSORIES

Description: TPS-102 Solar 12V battery charger kit

- Works in all weather conditions, including low light and cloudy conditions.
- Ideal for deep cycle or multiple battery banks
- Waterproof , shock, rust resistant
- Plastic framed to prevent scratching application
- Quick connect with different connector (alligator battery clamp + cigarette lighter plug + connecting wire to charge regulator) available.
- Built-in blocking diode to prevent reverse charging
- Precut hole with stainless steel screw is available for easy installation
- Special design poly-foam packing for individual product to prevent breakage during transportation

Technical data:

Peak power output: 12Watt

Optimum voltage: 17.50V

Optimum current: 685mA

Size: 1060X340X20mm

- Tested under standard condition: AM1.5, 100mW/cm², Module at 25⁰c.
- Customer required solar cell in different sizes and/or performance can also be provided.
