

PCI EXPRESS TO PARALLEL

Specification:

PCI express parallel(IC: MCS9901CV-CC)

PCI express serial (IC: MCS9922CV-CC)

PCI express to 2 Serial &1 parallel.

PCI express parallel(IC: MCS9901CV-CC)

PCI express serial (IC:MCS9922CV-CC)

PCI express to 2 Serial &1 parallel(IC:MCS9901CV-CC)

PCI Express 1 parallel port card

Single 5V operation (Standard)

Single 3.3V - 5V operation (RoHS)

Low power

PCI compatible dual UART

16-byte transmit-receive FIFO (UART)

Selectable receive trigger levels

Programmable baud rate generator

Modem control signals

5, 6, 7, 8-bit characters selection

Even, odd, no parity, or force parity generations

Status report capability

Compatible with 16C550

Multi-mode compatible controller (SPP, PS2, EPP, ECP)

Fast data rates up to 1.5 MBps (parallel port)

On-chip oscillator

Re-map function for legacy ports

16-byte FIFO (parallel)

Microsoft compatible

Software programmable mode selects

128-pin QFP package

The address does not support the original equipment, such as the 0378 address, such as KEYPRO .

Made In China
