

DIGITAL THERMOMETER ST-1A

Description:

ST-1A, with simple style, small and fashionable appearance, adopts microcomputer high-performance chip and high-precision sensors, can switch between °C and °F, measure and display the temperature clearly under the circumstances such as: Refrigerated cabinet, air-condition outlet, cold storage, also suitable for aquarium market, and household, and present action.

Operation instructions:

- 1-Open the battery cover to put in one LR44 battery correctly, pay Attention to the polarity.
- 2-Press "ON/OFF" key once, product is on; Another press "ON/OFF" Key, product is off.
- 3-Press "°C/°F" key to switch between °C and °F
- 4-LCD display "- - - °C" when measurement temperature is lower than -50° C, sensor probe can't be put into use when temperature exceeds +80° C, or sensor may occur thermal deformation.

Specifications:

Product Model	ST-1A
Temperature measuring range	-50° C~+80° C(-58° F~+176° F)
Accuracy	± 1° C(-20° C~+80° C); ± 2° F(-4° F~+176° F)
Resolution	0.1° C
Product size	55.5mm× 42.5mm× 16 mm
Sensors	NTC sensors(1 meter long)
Using environment:	Temperature: 0° C~60° C, Humidity: 20~85%
Power	one button battery (LR44, 1.5V)
