

2-Switch Rectangle Remote Control in Wall Model: BH0308C-2

- Only one live line installation and controlled advanced intelligent learning code type, any remote control and wall switch can be matched after finishing learning set operation.
- Energy sufficient, standby power consumption $\leq 0.03W$
- After power off, it stays OFF mode when power comes again to avoid waste.
- Remote control and manual switch, double operation
- 1~3 way switch
- Working voltage: 230V / 50Hz
- Transmission frequency: 433.9MHz
- Remote control distance: 30m (free area)
- Max load power: 300W (each way)
- Working temperature: $-10^{\circ}C \sim 50^{\circ}C$
- Widely used for incandescent lamp, halogen lamp, fluorescent lamp, energy saving lamp, etc.
