

Alarm system

Model: LS-9001A

Description:

To protect your home or business with a professional security system, LS-9001A is to gain full-time peace of mind. Whether you're on the premises or away, the LS-9001A can provide automatic around-the-clock protection against break-ins, burglaries and fires. Additionally, it can be initiated manually, to summon personal emergency assistance or call for police help even in a holdup or hostage situation.

Features:

- **ALL-IN-ONE SYSTEM**
LS-9001A covers all emergency situations, including burglary, fire, panic and medical assistance, and provides a new level of safety and security.
- **FULLY WIRELESS**
Each sensor in the LS-9001A system has a built-in radio transmitter, no hard wiring is required. Installation can be completed very quickly.
- **AUTO VOICE DIALER**
LS-9001A dials out the preset telephone numbers automatically when the system is activated, then advises the called party of alarm type and caller's address to summon help. The system will redial the number automatically in case of line busy, no answer, answering machine or even if a child answers the phone.
Up to nine telephone or pager numbers can be preset. Four of them are separately assigned to special numbers like police station, fire brigade and hospital for different alarm events.
- **HANDS-FREE SPEAKER PHONE**
After the connection of an emergency call, the called party can listen in or talk with the people near base unit directly, then take proper measures quickly. Moreover, you can use LS-9001A as a speaker phone for hands-free phone calls.
- **DIAL-IN CONTROL**
You can dial in from a touch-tone telephone anywhere in the world to arm, disarm the system, to listen in or to check the alarm record.
- **SUPERVISED SENSORS**
Door sensors and PIR sensors are always supervised by the system. In case you arm the system while a door or window is still open, LS-

9001A would emit a warning sound to remind you. In addition, the door sensors and the PIR sensors report to the system by sending "check-in" signal regularly. If any of these sensors are deactivated or removed, a warning indicator will advise you.

➤ **SMART CODE WITH MULTI-MILLION COMBINATIONS**

LS-9001A provides over 4.7 million codes for radio transmitters. By using the "smart code learning" technology, only learned transmitters can be incorporated in the system, this keeps the system in top privacy and avoid radio interference.

➤ **MULTI-ZONE WITH SELECTABLE PARTIAL ARM**

There are 9 burglar zones and 2 fire zones in the system. You can arm selected zones when you are home, leaving you free to move about in safety.

➤ **SIRENS AND AUXILIARY RELAY OUTPUT**

Either wired or wireless siren can be used in the LS-9001A, the former can be connected to the auxiliary relay output of the base unit, while the latter operates separately from the base unit and protects the location of the base unit from an intruder.

➤ **BACK-UP BATTERY**

With the internal battery, LS-9001A continues operating without interruption during a power break. Meanwhile, the voice message, telephone numbers and setting data saved in the memory can retain for months even no power supplies.

➤ **REMOTE CONTROL & WIRELESS KEYPAD**

You may control the LS-9001A remotely either by a 4-button remote controller or by a wireless keypad. With backlight feature, you can operate the wireless keypad in the dark. When unauthorized passcode is keyed in continuously, the system will lock, thus preventing anyone from tampering with the system. Owing to battery operation, it makes installation very easy and flexible. Meanwhile, low battery detection is a built-in feature.

➤ **WATERPROOF MEDICAL HELP BUTTON**

The single-button transmitter is designed to be worn on the wrist or on the neck. By pressing the button, you can trigger the alarm and summon help immediately.

The button is waterproof, extending the areas of use, around the house.

➤ **UNIQUE INACTIVITY MONITORING ZONE**

A PIR motion detector can be set as the monitoring device of this inactivity zone. If it does not sense any activity over a designated period of time(1~72 hours programmable) ,LS-9001A would dial outgoing calls automatically to summon help. For the old people who are home alone, this function can provide them with more secure life.

➤ **FULL RANGE OF ACCESSORIES**

A complete range of accessories is supplied in LS-9001A system, you may choose them according to the requirements of real condition, and expand the system easily whenever you need to.

➤ **CENTRAL MONITORING STATION LINK**

Thanks to the built-in digital communicator, LS-9001A can link up to a central monitoring station through telephone line when it is activated.

➤ **TELEVIEWER VIDEO TRANSMISSION SYSTEM**

Incorporating the latest image compression and telecommunication technologies, LS-9001A can send the high quality live video through the telephone line by dedicated video transmission system TeleViewer, to report security events and display on site images for you, at another location.

➤ **OTHERS**

Programmable Entry/Exit delay time

Programmable alarm time

Telephone line cut detection (optional)

Easy to check all settings and telephone numbers from the panel.
