

CAT 5 Tester Model: MS6811

Introduction:

The network cable tester is a small hand-held cable tester, which enables network professionals to quickly and easily verify the integrity of Ethernet twisted pair cables.

Features:

- Test device used with UTP (Unshielded Twisted Pair) and STP (Shield Twisted Pair) wiring.
- Checks continuity and configuration of wiring with unshielded and shielded modular plugs.
- Tests for open circuits, shorts, miswires, reversals, and split pairs.
- SHIELD detection tests a cable's shield integrity.
- Main unit and one remote allow one person to test 568A, T568B, 10Base-T, and Token Ring.
- DEBUG quickly identifies which cable pairs have a specific wiring fault.
- 6 volt battery is installed in the main tester unit (Remote unit is empowered).
- Battery low indicator.
