

Digital Car Battery Tester BT-300

Features:

- Tests the output voltage of a charger dynamo and checks the accidental short circuitry in wirings
- Portable, no power required
- charging system min voltage :13.7V

Temperature Compensation:

Battery temp	+20°F	0°F	-20 °F
Decrease bat rating by	1 step	2 step	3 step

Starting test:

Load voltage	Min voltage
10.2V	7.7V
10.4V	8.2V
10.6V	8.7V
10.8V	9.2V
11.0V	9.7V
11.2V	10.2V
11.4V	10.6V

Apply voltage of one class higher if the engine is smaller than 3.6L(200CID)
