

Sensitive Galvanometer (SM-1102)

GENERAL SPECIFICATION :

Designed for student to detect the weak current or the potential difference in DC circuit.e.g., it may serve as a current detector in experiments on bridge measurement, thermo-couple, electro-magnetic and photo-electric effect etc.

Specifications:

Sensitivity: 300uA.

Deviation: 5%

Internal resistance : G0: 80-125 , G1: 2.4k-3k

Dimensions: 100 x 138 x 97mm

Made in China
