

CABLE TRACER UNI-T UT682

Features:

Multi-functional wire tracker, such as telephone wire, network wire, power cable. Equipped with RJ11 and RJ45 cables and with interface on the transmitter. Network wire checking function, according to 18pcs indicators to judge normal/short-circuit/open-circuit/crossing. Easy and fast to locate the breakpoint without opening the wire's cover. Short-circuit/open-circuit detection and DC level testing function. Low battery indication(<6V) and volume adjustment function. A great tool for telecommunication engineering, Internet bar, network maintenance, etc.

Specifications:

Working Environment: 0°C~40°C, 20%~75%RH

Storage Environment: -10°C~50°C, 10%~90%RH

Altitude: ≤2000 meters

Signal Transmission: Multifrequency Pulse

Short Circuit/Open Circuit Detection: Yes

Distance of Audio Signal: ≥1000 meters

Distance of Sending Signal: ≥100 meters

DC Level Testing Range: ±3.3V~±52V(when the voltage>10V, the testing time<2 minutes, and the interval of each test>5 minutes)

Powered By(NOT Included): Emitter: 1 * 9V Battery; Receiver: 1 * 9V Battery

Transmitter Size: 125 * 48 * 28mm / 4.9 * 1.9 * 1.1in

Receiver Size: 195 * 48 * 30mm / 7.67 * 1.9 * 1.2in

Package List:

1 * Cable Transmitter

1 * Cable Receiver

1 * RJ11 Cable

1 * RJ45 Cable

1 * Crocodile Clip Adaptation Cable

1 * Carry Bag

1 * User Manual (English)
