

Smart Car Chassis

Model: KYSo02

Features:

- A simple mechanical structure, very convenient platform to build upon
- By four deceleration DC motor with flexible turning providing good steering direction
- 4 Wheel Drive for exceptional grip and control
- Smart car chassis is double layered to facilitate expansion of chipsets
- Mechanical structure is very simple and allows intuitive installation
- Equipped with four L293D motor drive modules and four tracking modules
- 51 seamless connections of the control unit, left red obstacle avoidance expansion hole

Specifications:

Operating Voltage	3 - 9V
Current	600MA
Reduction rate	1:48
Thicker	3mm
Driving type	4WD Robot Chassis
Weight	2kg
Car Chassis Size	26 x 14.9 cm

Smart Robot Car Chassis Kit included below:

- 1 x Car Chassis
- 4 x Gear Motor (1:48)
- 4x Car Tire (size: about 6.5 x 6.5 x 2.6 cm)
- 8 x Fasteners
- All Necessary Screw and Nut

Made in China
