

SOLENOID ZD131-L

Specification :

Second, key performance indicators:

1, Rated voltage DC: 3V

Action coil resistance: $R = 5.7 \pm 0.2$

Maintain the coil resistance: $R = 380 \pm 20\Omega$

2, with a pressure valve opens when the action 5KPa voltage $\leq 1.6V$, open valve to maintain voltage: $\leq 1.6V$, the release of closed valve voltage: $\geq 0.5V$;

3, stroke: 1.3 ± 0.2 ;

4, valve depth: $14.5 \pm 0.05mm$.

5, sealing diameter: $\phi 14mm$

6, valve seal strength: $\geq 50g$

7, air tightness: 10KPa water column

Third, the scope and benefits:

The products are mainly prepared for the gas-type stoves, its structural features are: The action to keep the coil to coil and complete the pull, hold, release procedures, with reliable action, and energy saving.

Made in china
