

FM OSCILLATOR 2W (88 108 MHz)

GE 211

BILL OF MATERIALS:

R1	: 120k oHM (brown, red, yellow)
R2, 3, 4:	5.6k oHM (green, blue, red)
R5	: 120 oHM (brown, red, brown)
P	: Variable resistor 22k
C1	: 4.7uf 35v
C2	: 4.7uf 35v
C3,C4	: 560pf
C5	: 15pf
C6	: 5.5 – 18pf variable condenser
T1	: bc557
T2	: sf118
L1	: coil

Adjustable: approx. 80...120 MHz. Operating voltage: 9...26V=, max. 2W input. Suitable for microphone or tape connector. **In the EC the device may only be used by licensed radio amateurs. The use as bugging device (mini-spy) or private radio transmitter is prohibited and a punishable offence (Europe).**
