

EM55

ULTRASONIC DISTANCE MEASURER

- Instant and accurate distance and acreage measurement by ultrasonic waves, an ideal tool for architects & layout designers
- Maximum measuring distance 12m (40ft)
- Memory storage and recall
- Sun function, area & volume computation
- Displays in imperial & metric values
- Laser targeting
- For indoor or outdoor use

Technical specifications

Distance range: 12m

Resolution: 0.01m (1/4 in)

Basic accuracy: $\pm 0.5\% + 1 \text{dgt}$ (in still air)

Laser beam: 650nm, <2mW

Laser safety: class II, visible, non-hazardous

The maximum distance & accuracy vary depending on environmental conditions such as temperature, humidity, altitude/barometric pressure & wind speed, etc.

Dimensions:

Battery: 9Vx1, 6F22

REF: 16EM55X0000
