

LUTRON HT3003

The Lutron HT-3003 is a handheld touchscreen remote control designed for use with Lutron HomeWorks QS and HomeWorks Illumination lighting control systems. It allows users to control lighting, shades, and other connected devices in a smart home environment. Here are some key features and details about the Lutron HT-3003:

Key Features:

1. **Touchscreen Interface:** The HT-3003 features a customizable touchscreen interface, allowing users to control various aspects of their home automation system with ease.
2. **Compatibility:** It is compatible with Lutron's HomeWorks QS and HomeWorks Illumination systems, which are designed for high-end residential and commercial applications.
3. **Customizable Buttons:** Users can customize the buttons on the touchscreen to control specific lights, scenes, shades, and other integrated systems.
4. **Wall-Mountable:** The remote can be mounted on a wall for easy access and a clean, integrated look.
5. **Battery-Powered:** The HT-3003 is battery-powered, making it portable and easy to use anywhere within the home.
6. **RF Communication:** It uses RF (radio frequency) communication to interact with the Lutron system, ensuring reliable operation without the need for line-of-sight.

Typical Uses:

- **Lighting Control:** Adjust individual lights or create lighting scenes for different activities or times of day.

LUTRON HT3003

- **Shade Control:** Operate motorized shades or blinds to control natural light and privacy.
- **Scene Activation:** Activate pre-programmed scenes that adjust multiple systems (lighting, shades, temperature) with a single touch.
- **Integration:** Works seamlessly with other Lutron devices and third-party systems integrated into the HomeWorks ecosystem.

Installation and Setup:

- **Professional Installation:** The HT-3003 typically requires professional installation and programming by a certified Lutron dealer or installer.
- **Customization:** During setup, the touchscreen interface can be customized to meet the specific needs and preferences of the homeowner.

Battery Life:

- The HT-3003 is powered by two AA batteries, which generally provide several months of use depending on the frequency of use.

Design:

- The device features a sleek, modern design with a high-resolution touchscreen that blends well with upscale home interiors.

Support and Resources:

- For more detailed information, including user manuals and programming guides, you can visit the official Lutron website or contact a Lutron representative.
