

MAGNIFIER HAND PROSKIT MA-025

The **Proskit MA-025** is a handheld magnifier, often used for inspecting small details in electronics, jewelry, or other precision work. Here's a quick overview of its features:

Key Features:

1. **Magnification:** Typically offers 5x magnification, making it ideal for detailed work.
2. **LED Illumination:** Built-in LED lights provide bright, focused illumination, which is especially useful in low-light conditions.
3. **Compact and Portable:** Its handheld design makes it easy to carry and use on the go.
4. **Battery-Powered:** Usually powered by AAA batteries, making it convenient for fieldwork.
5. **Ergonomic Design:** Designed for comfortable use during extended periods.

Common Uses:

- Inspecting circuit boards and electronic components.
- Reading fine print or small text.
- Jewelry repair and inspection.
- Hobbyist work like model building or crafting.
