

SOLDER STAND PROSKIT SN-002

The **Pro'sKit SN-002 Solder Stand** is a tool used to hold a soldering iron when not in use. It is designed to provide a safe and stable place to rest the hot soldering iron, preventing accidents or damage to surfaces. Here are some key features and details about the Pro'sKit SN-002:

Key Features:

1. **Heat-Resistant Material:** The stand is made from materials that can withstand high temperatures, ensuring durability and safety.
2. **Sponge Tray:** It typically includes a tray for holding a sponge, which is used to clean the soldering iron tip during use.
3. **Compact Design:** The stand is usually compact and lightweight, making it easy to place on a workbench.
4. **Stable Base:** It has a stable base to prevent tipping, ensuring the soldering iron stays securely in place.
5. **Compatibility:** Designed to accommodate most standard soldering irons.

Usage:

- Place the soldering iron in the stand when not in use to avoid burns or fire hazards.
- Use the sponge in the tray to clean the soldering iron tip by wiping it on the damp sponge.

Maintenance:

- Regularly clean the sponge and replace it when worn out.
- Ensure the stand is free from solder debris to maintain its functionality.
