

CURVED JAW LOCK PLIER PROSKIT PN-378D

The **Proskit PN-378D Curved Jaw Lock Plier** is a versatile hand tool designed for gripping, clamping, and holding objects securely. It features a curved jaw design, which provides a better grip on rounded or irregularly shaped objects. The locking mechanism allows the plier to stay in place, freeing up your hands for other tasks.

Key Features:

- **Curved Jaw Design:** Ideal for gripping pipes, rods, or rounded surfaces.
- **Locking Mechanism:** Keeps the plier securely clamped on the object.
- **Adjustable Opening:** Allows the plier to accommodate various sizes of objects.
- **Durable Construction:** Made from high-quality materials for long-lasting use.
- **Ergonomic Handle:** Provides comfort and reduces hand fatigue during extended use.

PN-378D

Adjustable Locking Plier 10"     

Common Uses:

- Plumbing tasks (e.g., gripping pipes)
- Automotive repairs
- General DIY projects
- Holding or clamping materials during assembly
